

Master Lock Padlock & Pucklock Product Sheet

Pad Lock Specs:

- 2" wide brass body
- 1 1/2" tall 3/8" diameter hardened boron alloy shackle
- Dual ball locking mechanism

Puck Lock Specs:

- 2 7/8" wide reinforced die cast body
- 3/8" diameter boron alloy shackle
- Re-keyable 6 pin cylinder

Options:

- Keyed different (standard)
- Keyed alike

Pad Lock Description:

These ProSeries® Padlocks are designed for Commercial/Industrial applications. Constructed of 2" (51mm) wide brass body provides extra corrosion resistance in caustic, corrosive, salty environments. A 1-1/2" (38mm) tall, 3/8" (9mm) diameter hardened boron alloy shackle is used for superior cut resistance. A Dual ball locking mechanism resists pulling and prying. High security, rekeyable 5-pin cylinder with spool pins is virtually impossible to pick.

Puck Lock Description:

These ProSeries® Padlocks are designed for Commercial/Industrial applications. The Lock body conceals shackle which defeats attempts to pry and cut. Made from 2-7/8" (73mm) wide reinforced die cast body it withstands forcible attacks. High security, rekeyable 6-pin cylinder with spool pins is virtually impossible to pick.
